

Online Learning Resources Year 6

In order to enhance the learning opportunities for your child when in the home environment, we felt it may be useful for you to know that you can access the online resources listed below that we utilise in school.

These are available for home use at no cost to yourselves by using the following links:

<https://www.mymaths.co.uk/>

<https://www.activelearnprimary.co.uk/login?c=0>

<http://uk.mathletics.com/signin/>

These are accessible by using the child's username and password that you will find inside the front cover of their homework diary which should be brought home daily. Your child will already be familiar with the requirements of each of the websites.

If you have any queries, please contact your child's class teacher in the first instance.
